# The Label

"From Past to Present"

About Etiteks

# Crafted with purpose. Built on trust.

We don't just make labels.

We craft lasting details for brands that care.

Since 1983, Etiteks has delivered premium labels — made with precision, designed to connect, and built to last.

Labels that last.

## Our Team

# Independent. Responsive. Committed.

At Etiteks, we keep things close — not just in how we work, but in how we relate.

We're structured enough to serve global brands, and lean enough to care about the details.

Every project gets personal attention.

No layers. No delays. Just people who know what they're doing — and do it well.

**It's not about being big. It's about being dependable.**

What We Do

# Labels that speak. Tags that connect.

We create high-quality branding elements that enhance both the look and feel of a garment.

From concept to completion, every detail matters.

At Etiteks, we don't just supply labels — we help brands express who they are, silently and precisely.

Because we know; the smallest things often say the most.

## What We Do

# A World of Labels, One Reliable Source.

At Etiteks, we craft labels and trims that shape a product's identity — and stand the test of time.

Our production covers three core categories:

### Branding Labels

Woven, embroidered, leather, silicone, and heat-transfer labels.

### Care & Composition

Size tabs, care instructions, and composition content labels.

### Tags & Packaging

Hangtags, stickers, cardboard inserts, and packaging components.

All under one roof. All with full traceability and precision.

## The Service

# We don't just deliver labels. We remove problems.

Labels are small — but never simple.

Wrong placements. Missing care info. Urgent changes. Miscommunication. We've seen it all.

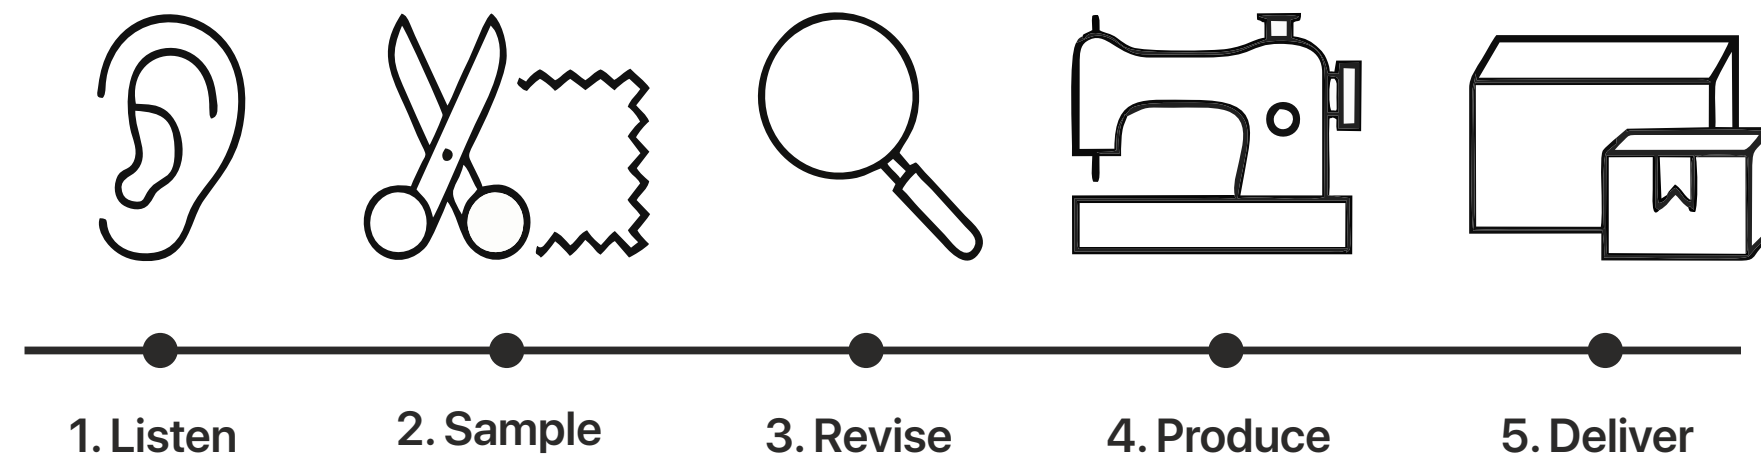

That's why we built our service around your challenges. From quote to delivery, we stay fast, responsive, and human.

We ask the right questions, flag what others miss, and act like a part of your team — not just your vendor.

When deadlines shrink or specs keep changing, you need more than a supplier.

You need someone who gets it — and gets it done.

From Idea to Label

# How we make it simple, reliable, and tailored.

## 01 / Brief & Consultation

You talk, we listen. Whether it's a rough sketch or a precise tech pack, we understand your needs and propose the right labeling solution.

## 02 / Sampling & Material Selection

We produce and ship samples tailored to your material, color, and finish preferences — fast and accurate.

## 03 / Feedback & Adjustments

Your input matters. We refine every detail to meet your expectations — no guesswork, no surprises.

## 04 / Production

Once approved, your labels go into production in our certified facilities with meticulous quality control at every stage.

## 05 / Packing & Delivery

We pack with care, ship on time, and offer full traceability — globally.

**Because every label tells a story and ours begins with you.**

**Standards**  
**(the way we make)**

## Materials & Certifications

# Conscious choices, proven standards.

We believe that what a label is made from matters just as much as how it looks.

That's why we choose our materials with care — from recycled yarns to FSC-certified paper, every component reflects our values.

Our production meets the highest standards in safety, sustainability, and transparency.

We offer certified solutions across our production and sourcing network — both in-house and through our trusted partners.

Sustainable materials used across all label categories — woven, printed, paper and beyond.

**We don't just claim it — we certify it.**

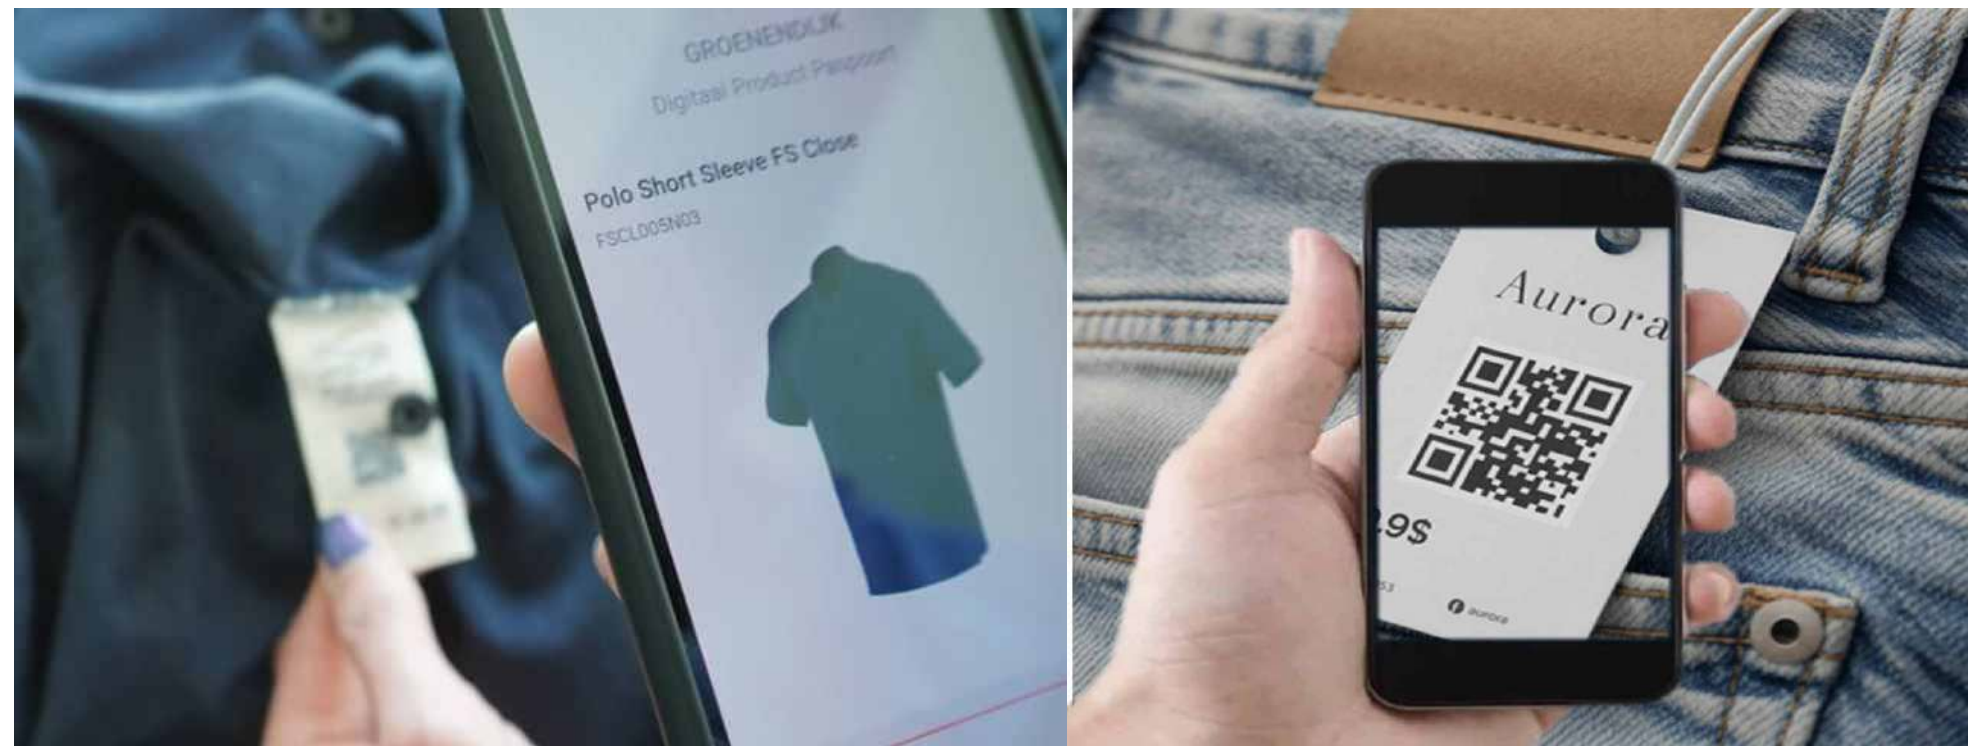

## Sustainability

# Not just a feature. A foundation.

Sustainability isn't an afterthought — it's how we've always worked.

From recycled yarns and FSC-certified paper to solar and wind-powered production, we reduce waste, rethink packaging, and design with care — for people and planet.

What we make leaves a mark. We choose to make it a responsible one.

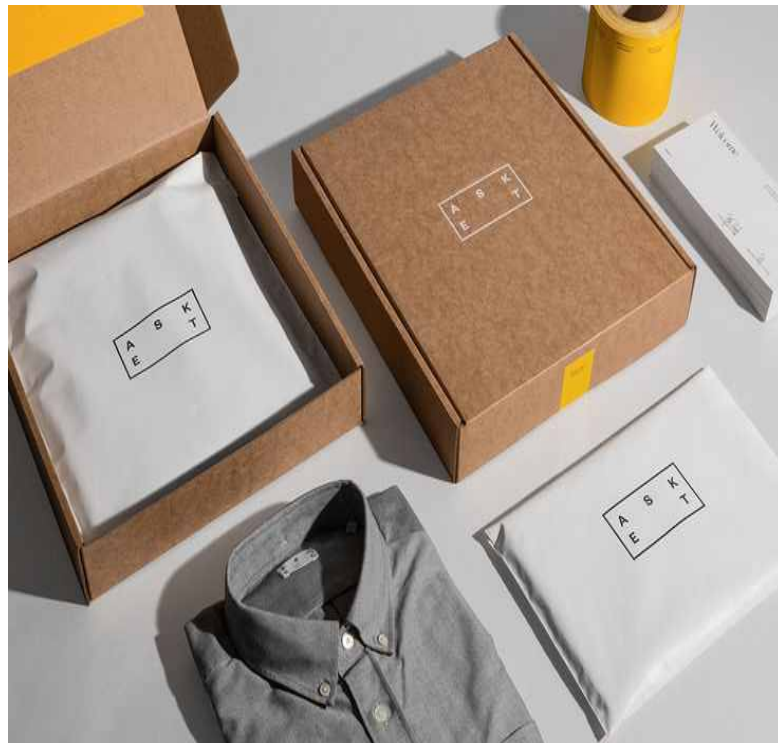

## Digital Product Passport

# Traceable. Transparent. Ready.

The EU is introducing Digital Product Passports —  
a system that makes every material, process, and supply chain detail visible.  
We've already implemented traceability systems that align with these new standards.  
From batch tracking to composition data and certifications,  
we're building structured, traceable systems that meet evolving standards.

**Because sustainable products need transparent partners.**

## Collaborations & Community

# More than a supplier. A Partner.

We work closely with our clients — because great results come from shared understanding and mutual trust. Whether it's developing custom solutions, responding swiftly to last-minute needs, or aligning with evolving sustainability goals, we act as a partner, not just a provider. And beyond our client work, we support our team, our local community, and the future of ethical production.

**Shared values make stronger products.**

## Contact

# Let's create something meaningful together.

Whether you have a project in mind or just want to explore what's possible, we'd love to hear from you.

# Where Labels Live

More than pieces of fabric or paper — our labels carry purpose.  
They live on garments, bags, boxes, and stories.  
In ateliers and factories, on shelves and streets, around the world.

This is a glimpse into their journey.  
How they connect, complete, and elevate.

**Welcome to where labels truly live.**
